Citizenship guest speakers

History Discussion Group

Dragon's Apprentice ... and many many more

Trips:

Trips provide a learning venue that matches a student's natural inclination to know more & engages students of all abilities and helps to put the learning subject in context. Group activities may include adventurous expeditions that develop social skills and self-confidence. For confident individuals, school trips can change attitudes and raise aspirations through participation in activities. Rising to new challenges and living alongside their peers helps pupils to become more adaptable and confident - critical to their development.

Schools trips provide powerful learning outcomes for young people that contribute to a sense of belonging, feeling valued and the ability to make a positive contribution in their community and society at large. Students become more resilient and optimistic and their emotional health and self-esteem improve.

All of these positive attributes help to develop skills and enhances existing ones as well as **improving a student's employability.**

Amongst *many* others, the following curriculum/non-curriculum trips take place throughout the school calendar on a rolling basis, for Years 7-13:

Geography; field trips

RS & Citizenship; trips

History; Ypres, Hastings plus archaeological dig

Business Studies; business wholesalers visit, Hayters trip, City of London trading floor visit
